Comments & Conclusions: Lanes 4, 5 are the test sample Shatavari (BSHAT29AUG22) Lanes 2, 3, 6, 7 are the reference samples used for comparison. This test sample, Shatavari (BSHAT29AUG22), is consistent with the chromatographic profile of the reference samples of *Asparagus racemosus* used above. **This test sample Shatavari (BSHAT29AUG22) has characteristics of a customized extract derived from *Asparagus racemosus* root.**

NOTE: The above conclusion may be a function of the natural variance found in botanicals &/or the extraction process used to create specific extracts. The growing and drying conditions, age, seasonal variations, geographic location, extraction solvents, etc. all play a role in the phytochemical fingerprint of botanicals as well as their extracts; hence, chromatographic variations are expected.
