Comments & Conclusions: Lane 6 is the test sample Bacopa (BBACO23AUG22). Lanes 1, 2, 7, 8, are the reference samples used for comparison. This test sample, Bacopa (BBACO23AUG22) is consistent with the chromatographic profile of the reference samples of *Bacopa monnieri*, used above. **This test sample Bacopa (BBACO23AUG22) has characteristics of *Bacopa monnieri* entire.**

NOTE: The above conclusion may be a function of the natural variance found in botanicals &/or the extraction process used to create specific extracts. The growing and drying conditions, age, seasonal variations, geographic location, extraction solvents, etc. all play a role in the phytochemical fingerprint of botanicals as well as their extracts; hence, chromatographic variations are expected.
