Comments & Conclusions: Lane 4 is the test sample Eleuthero (BEL27JUN22) Lanes 1, 2, 6, 7 are the reference samples used for comparison. This test sample, Eleuthero (BEL27JUN22), has characteristics of the chromatographic profile of *Eleutherococcus senticosus* reference samples used above. **This test sample Eleuthero (BEL27JUN22) indicates the presence of *Eleutherococcus senticosus* root.**

NOTE: The above conclusion may be a function of the natural variance found in botanicals &/or the extraction process used to create specific extracts. The growing and drying conditions, age, seasonal variations, geographic location, extraction solvents, etc. all play a role in the phytochemical fingerprint of botanicals as well as their extracts; hence, chromatographic variations are expected.
