Comments & Conclusions: Lanes 4, 5 are the test sample Reishi (BREIS03APR23) Lanes 2, 3, 6, 7, 8 are the reference samples used for comparison. This test sample, Reishi (BREIS03APR23), has characteristics of the chromatographic profile of *Ganoderma lucidum* s.l. reference samples used above. **This test sample Reishi (BREIS03APR23) indicates the presence of *Ganoderma lucidum* s.l. fruiting body.**

NOTE: The above conclusion may be a function of the natural variance found in botanicals &/or the extraction process used to create specific extracts. The growing and drying conditions, age, seasonal variations, geographic location, extraction solvents, etc. all play a role in the phytochemical fingerprint of botanicals as well as their extracts; hence, chromatographic variations are expected.
