Comments & Conclusions: Lane 4 is the test sample Goji (BGOJI02FEB23) Lanes 2, 3, 8 are the reference samples used for comparison. This test sample, Goji (BGOJI02FEB23), has characteristics of the chromatographic profile of *Lycium* sp. 'Goji' reference samples used above. **This test sample Goji (BGOJI02FEB23) indicates the presence of *Lycium* sp. 'Goji' fruit.**

NOTE: The above conclusion may be a function of the natural variance found in botanicals &/or the extraction process used to create specific extracts. The growing and drying conditions, age, seasonal variations, geographic location, extraction solvents, etc. all play a role in the phytochemical fingerprint of botanicals as well as their extracts; hence, chromatographic variations are expected.
