Comments & Conclusions: Lanes 5, 6 are the test sample Pine Pollen Tincture (202201226) Lanes 2, 7 are the reference samples used for comparison. This test sample, Pine Pollen Tincture (202201226), has characteristics of the chromatographic profile of *Pinus sp.* reference samples used above. **This test sample Pine Pollen Tincture (202201226) indicates the presence of *Pinus sp.* pollen.**

NOTE: The above conclusion may be a function of the natural variance found in botanicals &/or the extraction process used to create specific extracts. The growing and drying conditions, age, seasonal variations, geographic location, extraction solvents, etc. all play a role in the phytochemical fingerprint of botanicals as well as their extracts; hence, chromatographic variations are expected.
