Comments & Conclusions: Lane 5 is the test sample *Schizandra* (BSCHIZ04NOV22). Lanes 2, 3, 6, are the reference samples used for comparison. This test sample, *Schizandra* (BSCHIZ04NOV22) is consistent with the chromatographic profile of the reference samples of *Schizandra chinensis*, used above. **This test sample *Schizandra* (BSCHIZ04NOV22) has characteristics of *Schizandra chinensis* fruit.**

NOTE: The above conclusion may be a function of the natural variance found in botanicals &/or the extraction process used to create specific extracts. The growing and drying conditions, age, seasonal variations, geographic location, extraction solvents, etc. all play a role in the phytochemical fingerprint of botanicals as well as their extracts; hence, chromatographic variations are expected.
