<u>Comments & Conclusions:</u> Lane 5 is the test sample Tongkat Ali (BTKA07DEC23) Lanes 1, 2, 6, 7 are the reference samples used for comparison. This test sample, Tongkat Ali (BTKA07DEC23), has characteristics of the chromatographic profile of *Eurycoma longifolia* reference samples used above. This test sample Tongkat Ali (BTKA07DEC23) indicates the presence of *Eurycoma longifolia* root.

NOTE: The above conclusion may be a function of the natural variance found in botanicals &/or the extraction process used to create specific extracts. The growing and drying conditions, age, seasonal variations, geographic location, extraction solvents, etc. all play a role in the phytochemical fingerprint of botanicals as well as their extracts; hence, chromatographic variations are expected.
