Comments & Conclusions: Lane 4 is the test sample Cistanche (BPCIST15NOV22) Lanes 1, 2, 3, 5, 6, 7 are the reference samples used for comparison. This test sample, Cistanche (BPCIST15NOV22) is consistent with the chromatographic profile of the reference samples of *Cistanche* sp., used above. **This test sample Cistanche (BPCIST15NOV22) has characteristics of *Cistanche* sp., stem.**

NOTE: The above conclusion may be a function of the natural variance found in botanicals &/or the extraction process used to create specific extracts. The growing and drying conditions, age, seasonal variations, geographic location, extraction solvents, etc. all play a role in the phytochemical fingerprint of botanicals as well as their extracts; hence, chromatographic variations are expected.
